eswarms565@gmail.com | 6379084809 | Chennai, TamilNadu | [linkedin.com/in/eswar-dev/](https://www.linkedin.com/in/eswar-dev/) | [github.com/Eswar565](https://github.com/Eswar565)

Software Developer with experience in developing and maintaining responsive web applications. Proficient in modern JavaScript, Python, and SQL, with a proven track record of integrating front-end components with back-end services and optimizing relational database queries. Demonstrated success in applying machine learning to enhance system capabilities, as evidenced by the development of a real-time emotion recognition system and a phishing URL detection system. Holds a B.E. in Computer Science Engineering and certifications in Python full stack development and AI fundamentals.

## EXPERIENCE

### Software Developer

Jul 2026 – Present

*Viar1 Innovations | Chennai, TamilNadu*

- Develop and maintain responsive web applications, building intuitive user interfaces with modern JavaScript.
- Integrate front-end components with back-end Python services, ensuring seamless data flow and system stability.
- Design and optimize relational database queries using SQL to efficiently store and retrieve application data.
- Participate in daily stand-ups and code reviews to improve code quality and learn industry best practices.

### Web Development Intern

Oct 2025 – Nov 2025

*FrontierWox Tech Private Limited | Trichy, TamilNadu*

- Built and maintained responsive web applications using HTML, CSS, JavaScript, and modern web development concepts.
- Worked on frontend development, debugging, and improving user interface design for better user experience.
- Gained hands-on experience with Git, GitHub, project deployment, and collaborative development workflows.

## PROJECT

*Sentify: Emotion Detection*

- Developed a real-time emotion recognition system using CNN (Convolutional Neural Network) for facial expression classification.
- Implemented face detection using OpenCV Haar Cascade and emotion analysis using DeepFace.
- Classified emotions into Happy, Sad, Angry, Fear, Surprise, and Neutral states
- Integrated Gemini AI to deliver personalized recommendations for activities, music, movies, and motivation based on detected emotions
- Built a web-based application using Python, Flask, HTML, CSS, JavaScript. Optimized real-time processing latency to approximately 0.5–1.5 seconds per frame.

*URL Phishing: Real-Time Network Traffic Analysis and Intrusion Detection*

- Enhanced a machine learning-based phishing URL detection system capable of identifying malicious and legitimate websites by analyzing URL structures, domain-related features, and security indicators.
- Built a complete web application using Flask, integrating frontend and backend components to provide real-time URL prediction through an interactive and user-friendly interface.
- Performed data preprocessing, feature extraction, and model training using Python libraries such as Pandas, NumPy, and Scikit-learn to improve prediction accuracy and model performance.
- Implemented version control and project management using Git and GitHub, enabling efficient code maintenance, project tracking, and deployment workflow management.

## EDUCATION

### K.L.N. College of Engineering

2022 – 2026

*Computer Science Engineering*B.E.

GPA: 7.4/10

## **CERTIFICATES**

### **Python full stack (course)**

Reputed Institute

### **AI Fundamentals: Foundations for Understanding AI**

IBM SkillsBuild

Nov 2025

## **SKILLS**

### **Programming Languages**

Python, JavaScript

### **Frontend Technologies**

HTML5, CSS3, Bootstrap, ReactJS, Responsive Web Design

### **Backend Technologies**

Django, Flask

### **Database**

MySQL, SQL, Database Design, CRUD Operations

### **Tools**

Jupyter Notebook, VS Code

### **Core Concepts**

Object-Oriented Programming(OOP), Data Structures, SDLC, Debugging, Exception Handling, AI
